

Center 1: Reading and Understanding Three Digit Numbers

Name: _____

Date: _____

Instructions:

Center 1: Reading and Understanding Three Digit Numbers

1. Each student rolls a die three times and records the three-digit number he/she makes. Example: A student rolls a 4-2-1. He/she records the number 421.
2. When all students in the group have had a turn to roll the die and record their number, each student will read his/her 3 digit number and determine whose has the largest number. The student with the largest number wins. Students play until someone wins 3 out of 5 times or it is time to rotate centers. (Note: you may wish to alternatively have the student with the smallest number win.)

Names of the students in the group	Roll 1 (record #)	Roll 2 (record #)	Roll 3 (record #)	Roll 4 (record #)	Roll 5 (record #)	Roll 6 (record #)	Roll 7 (record #)	Roll 8 (record #)
	Record the person's name with the largest number and record the number below	Record the person's name with the largest number and record the number below	Record the person's name with the largest number and record the number below	Record the person's name with the largest number and record the number below	Record the person's name with the largest number and record the number below	Record the person's name with the largest number and record the number below	Record the person's name with the largest number and record the number below	Record the person's name with the largest number and record the number

- Each student rolls a die three times and records the three-digit number they make.
- They should also record the numbers of the others in their group.
(Ex. student 1 rolls a 4,2,1 He records the number 421.)
- When all students at the table have had a turn to roll the die and record their number, each student will read their 3 digit number and determine whose is the largest.
- The student with the largest number wins. Students play until someone wins 3 out of 5 times or it's time to rotate centers.
(You can also have the smallest number win.)
